

8th International Congress on Vascular Access

April 25–27, 2013 | Prague, Czech Republic

**Vascular access – lifeline for hemodialysis –
How does it help and how does it harm?
Heart and arteries in ESRD patients**

Dear colleagues,

The biannual Vascular Access Society (VAS) congress is the most important international meeting for vascular surgeons, radiologists, nephrologists, dialysis nurses... – simply for all, who take care of dialysis access patients. The next (8th) VAS congress will be held in Prague on 25–27 April 2013.

Please come to the next VAS congress and hear both traditional and new topics:

Other topics

New technologies
Late breaking clinical trials
Difficult cases – different viewpoints
Mechanisms of access complications
and many others...

Hands on workshops

Vascular access ultrasonography
Vascular mapping prior to access creation
Ultrasound-guided central vein puncture
Buttonhole technique
Permanent catheter care

Registration opens in September 2012. Summarize your data and send the abstract or simply come and listen to your colleagues' experiences.

**See you in Prague – probably the most
beautiful city in the world!**
