Komplexní diagnostika a terapie karcinomu prsu

Zlín, Academia centrum UTB, 6.-7.11.2008

Vážené kolegyně, vážení kolegové,

Péče o pacientky s karcinomem prsu se dramaticky mění na celém světě a zásadní změny postojů k této dříve podceňované diagnóze pozorujeme i u nás. Moderní multimodální terapie je běžnou praxí a léčba již dávno není vedena jednotlivci, ale specializovanými týmy. Výsledkem je výrazný pokrok ve všech oblastech diagnostiky a léčby karcinomu prsu, v prodloužení doby přežívání a v poklesu úmrtnosti. Bez mezioborové spolupráce není moderní léčba možná.

Předkládáme vám možnost setkání se špičkovými odborníky, zastupujícími jednotlivé zainteresované obory, které se podílejí na diagnostice a léčbě karcinomu prsu a zároveň srovnání evropských názorů a zkušeností s americkými.

Účast výjimečných osobností světové mammologie podporuje a vyzvedává úroveň a profesionalitu tohoto setkání.

Nechť příjemně a užitečně prožijete tyto dny ve Zlíně!
